As expected, good comments from both. We will want to make sure we are clear in what we want in our coverage, and we do want to make sure we do hit on type N streams. I'll see how we can reinforce both of those points.

Hi Alan, I just talked with John and Rochelle. I'm sure we'll get comments from Rochelle. John already looked it over briefly and may add a couple of comments. His main suggestion is that we be more direct in what we want out of a Rule, riparian buffer width and scope. Rochelle also reminded me of a point I wanted to ask you, which is how much to emphasize the non-fish bearing stream part of the riparian rule. Food for thought.

**Subject:** Testimony for the upcoming Oregon Board of Forestry meeting

The Oregon Board of Forestry is meeting on April 22, 2015. It is during this meeting that the ODF staff will present information and data to the Board that will provide the Board with options on how to shape revisions to the ODF riparian rules. Tony Barber, the OOO Director and executive sponsor for the Region 10 Forestry Team will be testifying on behalf of EPA. I will join Tony.

Attached is a draft of the testimony that Jenny prepared for Tony. It is not too long. We would greatly appreciate your thoughts on it. Based on your input, it will be revised and sent to Tony, Christine and Dan for their input. It would be great if we could get your thoughts by COB on Thursday.

If you have any questions, please feel free to give me a call.

Alan
